proportional control

PH180 in stowed position

Stabiliser leg  
& outrigger pad (options)

...perfect for all types of load handling operation.

PH270 in stowed position

ECI: Electronic Capacity Indicator

Lifting attachments & accessories

**Versatile & easy to operate**

All PH Cranes are designed to be handled by a single operator and are used across various market sectors including highways, utilities, local authority, distribution, delivery, hire companies and the building and construction industry.

**Smooth & precise load handling**

Hydraulic control prevents the need to access the bed of the vehicle. Proportional controls ensure precise and controlled movements.

**High strength & durable yet compact & lightweight**

Manufactured from the latest high quality steels helping to reduce emissions, maximise fuel economy and payload.

**A sound investment**

PH Cranes eliminate the need to use excess time and resource, resort to manual labour or rental services.

**Nationwide servicing**

High quality, durable parts are used with OEM spares available on stock in the UK. Our nationwide network provides planned maintenance including Statutory Inspections ensuring full compliance with current legislation.

# Our **best** sellers.

**PH110**

An extremely compact crane with a very low self-weight, from only 105kg. This robust little crane stands just 1.2 metres tall but has an outreach of up to 4.5 metres.

**PH150**

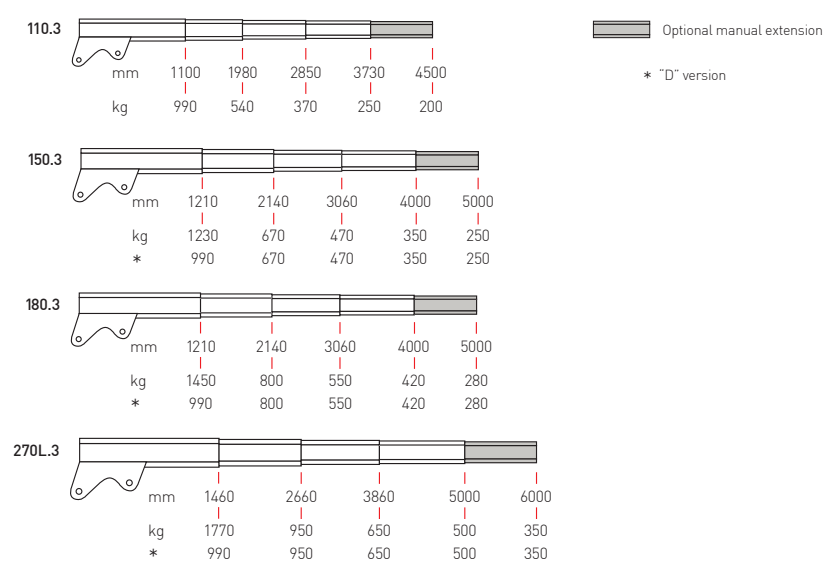

A lightweight crane from just 165kg. Fully rated it can lift 1300kg and with an optional outreach of 5 metres it is a serious contender.

**PH180**

The lightweight crane that packs a heavyweight punch. It has a self-weight from only 180kg and an optional boom outreach of 5 metres.

**PH270L**

With a self-weight from just 225kg, fully rated this powerful crane can lift in excess of 2000kg. It has a boom outreach of 6 metres.

# After-sales care.

## Planned Maintenance

Current legislation requires that each item of lifting equipment be Thoroughly Examined at least once in every 12 month period by a competent person. Our planned maintenance programmes will ensure continued, safe, reliable use of the equipment and full compliance with current legislation.

## Installation

Penny Hydraulics offer a full and comprehensive fitting service at their purpose built facility in Clowne, Derbyshire. Not only does this ensure the correct and safe installation of your lifting equipment, it minimises vehicle movement and downtime. Cranes may be dispatched to a competent installer of your choice if this is preferable.

Talk to your local sales representative to find out more about what we can do for you, or see our full range at [PH-Cranes.com](http://PH-Cranes.com)
